

Form Field Options

This is an interactive sample. You can type, click, and interact with most of the options here.

Text boxes can be single (L) or multi-line (R). Specific formats can be set like *time* (L) or *percentage* (R).

This is a date picker box

Simple checkboxes

These are radio buttons that let you pick one option. There can be more than 2 choices.

A list box allows selection of one or more options from a list of data. Hold the CTRL key to select more than one

A dropdown box allows a choice of a single option from the list of options.

This is a signature box. You can use it for full signatures or just initials if the box is smaller.

This is a Barcode, QR code and Data Matrix code.

This is a picture upload box.

Buttons can be setup to perform a variety of actions like save, e-mail, print, etc.

NOTE: All fields have a choice of border style or no border, font, font color, font size, plain or rich text, background color, etc.

Choice A	Choice B
Yes	No
True	False

NOTE: By default all fields are optional. This means that data does not have to be entered to submit or save the form.

You can choose to make certain fields required to have data before submitting or saving.

NOTE: To create a code, the data that will be encoded into the code needs to be specified. This is usually a hyperlink to a website, but it can contain any information you choose.

All fields are custom sized to fit your existing paper form. Keep in mind that the text or data will also be sized to fit the field size. If you have a lot of fields or boxes on a page the data fields can end up very small.
